

Noah Woodward

FULL STACK IOS / BACKEND DEVELOPMENT

noahwoodward2244@gmail.com · <https://www.makeschool.com/portfolio/NoahWoodward/> · github.com/woodward4422

San Francisco, CA 94108

SKILLS

Full Stack iOS

Swift 4,UIKit, Core Data, Objective C(learning), Protocol Oriented Programming, Firebase, MVC architecture, git

Backend Development

Node.js,Express,Mongo DB,Python(Flask), Heroku,Mocha and Chai(Testing), Handlebars(Server-side rendering templates), git

Programming Languages

Swift, Python,Node.js, JavaScript, HTML & CSS

Software

Sketch, Xcode, AWS Services, inVision, CircleCI

EDUCATION

Make School at Dominican University

B.S in Applied Computer Science

Expected Grad: 2020

iOS Full Stack and Backend Web Development Concentrations

INTERESTS/HOBBIES

- Compete in Golf Tournaments
- Watch and analyze Football(American)
- Play Video Games
- Compete in Hackathons

Long Term Objectives

Work on a consumer facing iOS application as an iOS developer

Experience

Bluefin Technology Partners — Software Engineer

March 2018-present

Stack: Node.js, AWS, Alexa SDK

Worcester, MA

- Designed and developed Alexa based software solutions
- Alexa Lead for clients that included Johnson and Johnson
- Established a Node.js-Alexa code base that reduced MVP delivery dates by approximately 15%
- Pioneered voice first UX guidelines for interaction models
- Shipped four production Alexa skills to store
- Recognized by Amazon as an international Subject Matter Expert as an Alexa developer
- Contributed to a growth in revenue of Alexa department by over 500% in past year

Hobby Projects

KifuSF— iOS Developer

July 2018-November 2018

Stack: Swift, Firebase, Cocoapods, MVC, Alamofire, Core Data

Ongoing

- Recognized by the Girls in Tech San Francisco as a top product at their hosted hackathon (3rd Place)
- Took initiative to lead the team after the hackathon to finish the product and expecting MVP delivery by early Q4 2018
- Built network and authentication layer, and current lead of business operations

Knapsack—Sole iOS Developer

June 2018-July 2018

Stack: Swift, Alamofire, Core Data, Table Views, Google Places API

Live on App Store

- Extensive integration of external weather APIs with SwiftyJSON and Alamofire
- User testing and user experience research to reduce the app to a two screen navigation
- Showcased at a product demo day in San Francisco as an honorable mention

Professional Projects

Aveeno Me Timer— Back-end Software Engineer

September 2018-October 2018

Stack: Node.js, AWS Lambda, AWS S3, Regression Teststing, Alexa SDK

Live(UK)

- Worked on a team of two to develop a testable prototype in six days
- Designed an audio mapping system to handle over 1000+ minutes of independent audio files
- Received a 3.75 out of 5 star rating during beta release
- November release expected to reach 10,000+ customers

National Dentex— Back-end Software Engineer

August 2018-September 2018

Stack: Node.js, AWS Lambda, AWS SES, Alexa SDK

Live(US)

- Applied knowledge of micro service architecture to develop a modular solution
- Built the custom B2B application to be installed in over 50+ dentist offices
- Designed a scalable email system with an AWS SES integration for Alexa
